

SIMPLIFIED ISSUE TERM CARRIER APPETITE GUIDE

When doing your initial fact-finding of your applicant’s health history, you will run into some cases that are difficult to decide which of your companies will accept them.

This Appetite Guide is an unofficial document to be used as an aid to assist you as well as a reference guide for health conditions asked on the application. It is not intended to be looked at as the perfect solution and does not override any company guidelines.

Primary Carriers and products for Simplified Issue Term:

Underwriting for Simple Issue Term

Unlike SIWL, the SIT plan counts the conditions as a cumulative table rating. Most SIT plans are rated as a Table 4 as Standard and issued to age 65 (Some Exceptions: Americo-Age 70, Occidental TMS – Age 75, Transamerica & UHL – Age 60).

As each individual condition is separately considered a Standard Risk by the attached chart, the combination of conditions may cause the application to be declined based on a cumulative condition table count. Examples are: Weight may be Table 2, HBP is Table 2 for a total of 4 tables, any other condition (oral diabetes – Table 2) would be more than 4 tables and cause the app to be declined.

The best underwriting guide to familiarize yourself with conditional underwriting table risks is the MOO/UOO underwriting guide. Also, it is sometimes better to do an underwritten case (non-med) so that an APS can be ordered to be considered for table shaving on risks, American National (ANICO) is very liberal in this instance.

Regards,

The Skipper

MORTGAGE PROTECTION MARKET NOTE

This market is mostly sold to Baby Boomers with an average age of 58 in Most States when using direct mail as a lead source. Because of an older prospect, underwriting concerns are more prevalent in the household. SIWL is a unique alternative to allow for more adverse underwriting conditions to be successfully placed for level insurance. The prospect purchases SIWL for income replacement, allowing the beneficiaries to pay the mortgage payment for 2 to 3 years. Ex: payment is \$800/mo x 24 mo = \$19,200. This is also used for pricing as it is sometimes lower in monthly cost than choosing a Term Plan to payoff the entire Mortgage balance.
